GENERAL INFORMATION

A No. 4 Steel Crochet hook is recommended for one who crochets tightly; a No. 6 is recommended for one who crochets loosely. It is best to crochet fairly tight to obtain firmness and body. This is especially important on hats in order to obtain the correct headsizes from instructions as given. All instructions are for hats of 22" headsize.

If Gimp is crushed slightly on tube, steam the finished article slightly or dip it in warm water. This will fluff up Gimp to natural size.

Gimp should be washed in warm water with white soap. Place in towel and squeeze, do not wring. Hang out of doors to dry.

SPECIAL NOTE

At start be sure to purchase enough Gimp of the same dye lot to complete the article to be made as next dye lot may vary slightly in color.
